Skills

I am efficient in JavaScript, HTML+CSS and SQL. My current development stack stack of choice includes NodeJS, ExpressJS, Git & GitHub, Linux and PostgreSQL. I have interests and also been exposed to OOP (Java) ,Python and Database development. Other skills I possess include Project Management, Low level Business Analysis, Basic Relational Database design and implementation.

Projects

2018 - Online Shoe Catalogue

https://vtrev-shoesapi.herokuapp.com

Github Repository: https://github.com/vtrev/shoe-store

A fully integrated online shoe store, users can add shoes to cart, remove them or checkout and the stock is updated accordingly. The app runs on NodeJs+Express, and uses handlebars to template the front-end, the shoe items are stored in a postgres database and an API is used to fetch the shoes.

This project was one of my fullstack projects @ProjectCodeX

2018 - Western Province Registrations

https://vtrev-registrations.herokuapp.com/

Github Repository: https://github.com/vtrev/registrations-webapp

An app that allows for users to add car registrations into the app.

The registration numbers are stored in a database and can be retrieved back with filters for specific towns.

App runs on NodeJs+Express server and stores the waiter data and shifts on a Postgresql Database

This project was one of my fullstack projects @ProjectCodeX

Education

University of the Western Cape / Bcom (IS)

(345 out of 365 Credits completed)
